At ALUMIL we build excellence every day.

Due to our state-of-the-art production infrastructure and rigorous quality controls throughout the entire production process, we achieve the creation of products with superior quality and high added value.

With more than 30 years of experience and 2.200 employees, ALUMIL is one of the world's leading companies in the design and production of aluminum architectural systems. Our mission is to improve the quality of people's life by enhancing the performance of their buildings, with products of the highest quality, technology and aesthetics.

ALUMIL is offering a vast range of adjustable as well as fixed pergolas, which have been developed precisely in accordance with our vision for excellent architectural systems offering exceptional top-quality solutions, which incorporate advanced technology.

La ALUMIL construim excelenta in fiecare zi.

Prin intermediul facilitatilor noastre moderne de productie si prin controlul strict al calitatii, de-a lungul intregului proces de productie, asiguram crearea unor produse superioare, cu valoare adaugata ridicata.

Cu o experienta de peste 30 de ani si 2.200 de angajati, ALUMIL este una dintre cele mai avansate companii la nivel global in domeniul proiectarii si productiei de sisteme arhitecturale din aluminiu. Misiunea noastra este de a imbunatati calitatea vietii oamenilor prin dezvoltarea continua a performantelor cladirilor, utilizand produse de cea mai inalta calitate, tehnologie si estetica.

ALUMIL ofera o gama variata de pergole cu lamele mobile si fixe, dezvoltate in deplina conformitate cu viziunea noastra de a oferi sisteme arhitecturale excelente care ofera solutii exceptionale si de inalta calitate, incorporand tehnologii avansate.

When innovation leads to perfection

Cand inovatia conduce spre perfectiune

MYKONOS

ALUMIL has created an impressive range of bioclimatic pergolas, fully automated and equipped, to convert your outdoor space into a comfortable living experience. The rotating louvers create a very robust and electrically adjustable shutter structure (0-135°) for controlled sun-shading, regulated brightness and airflow, as well as effective protection against rain and harsher weather conditions.

Integrated sliding glass panels, rolling shading screens, top-hung vertical shutters, lighting and heating devices, everything with state-of-the art automation to fulfill your individual needs.

Ideal for free-standing, wall-mounted and multiple structures applied in residences, patios and gardens as well as in hotels, restaurants, roof gardens and many other commercial outdoor spaces.

> SMARTIA
PG120P Mykonos

ALUMIL a creat o gama impresionanta de pergole bioclimatice, complet automatizate si echipate, pentru a va transforma spatiul exterior intr-un living comod si placut. Sistemul de rotatie al lamelelor (0-135°) creeaza o structura de inchidere automatizata si robusta pentru o umbrire controlata, luminozitate reglabila precum si o protectie eficienta impotriva ploii si a conditiilor meteorologice mai aspre.

Permite integrarea sistemelor glisante vitrate, panourilor de umbrire tip rulou, jaluzelelor verticale, dispozitivelor de iluminat si incalzire, actionate de automatizari de ultima generatie menite sa satisfaca toate nevoile individuale.

Ideal pentru structuri libere, multiple, montate pe perete sau pe piloni individuali pentru a fi utilizate atat in resedinte private, terase si gradini, precum si in hoteluri, restaurante si multe alte spatii comerciale in aer liber.

> SMARTIA
PG160P Santorini

MYKONOS

OUR PHILOSOPHY

- / A state-of-the-art product due to our different design approach.
- / High aesthetics and minimal design with emphasis on detail.
- / High quality and reliability for a long-lasting result.
- / Vast range of solutions to meet every need.
- / Great variety of surface treatment and finishes.
- / ALUMIL Group reliability.

FILOZOFIA NOASTRA

- / Un produs de ultima generatie datorita abordarii inovative in procesul de proiectare.
- / Estetica deosebita si design minimalist cu accent pe detalii.
- / Calitate ridicata si fiabilitate pentru un rezultat de durata.
- / Gama variata de solutii pentru a satisface toate nevoile.
- / O mare varietate de finisaje.
- / Fiabilitatea brandului ALUMIL

UNPARALLELED BENEFITS

- / Efficient protection against sunlight, rain, snow and other weather conditions.
- / An absolute bioclimatic structure integrated with side elements, such as glass panels, rolling shading screens, LED lighting and sliding shutters.
- / Extremely robust constructions, which allow very wide dimensions up to 7,5 x 7,5 m and resist up to 300 Kg/m² or 2,0 m of snow.
- / State-of-the-art fittings and fully compatible automation systems.
- / Unique ease of installation.

BENEFICII INEGALABILE

- / Protectie eficienta contra razelor solare, ploii, zapezii, precum si impotriva altor fenomene climatice deosebite.
- / Structura bioclimatica, ce integreaza elemente adiacente, precum panelurile glisante din sticla, sisteme de umbrire sau protectie impotriva insectelor, iluminare LED sau rulouri exterioare.
- / Structura extrem de solida, ce permite realizarea de pergole la dimensiuni foarte mari, de pana la 7,5 x 7,5 m si rezistenta pana la 300 Kg/m² sau 2,0 m de zapada.
- / Accesorizare de ultima generatie si integrare perfecta a sistemelor de automatizare.
- / Instalare extrem de usoara.

More than a shading shelter, a real living space

Mai mult decat un acoperis de umbrire ,
un spatiu real de locuit

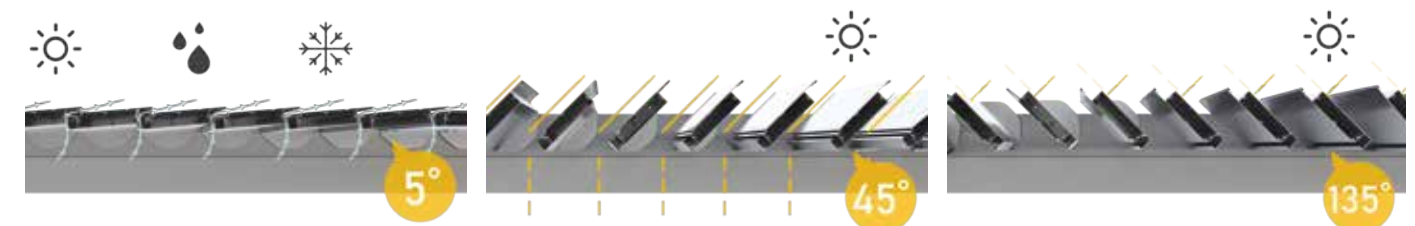

Thanks to the bioclimatic design philosophy, essential parts can be additionally integrated to create controlled shading, ventilation and temperature. Our pergolas literally extend your indoor space, converting it into a new living room to be used all year round.

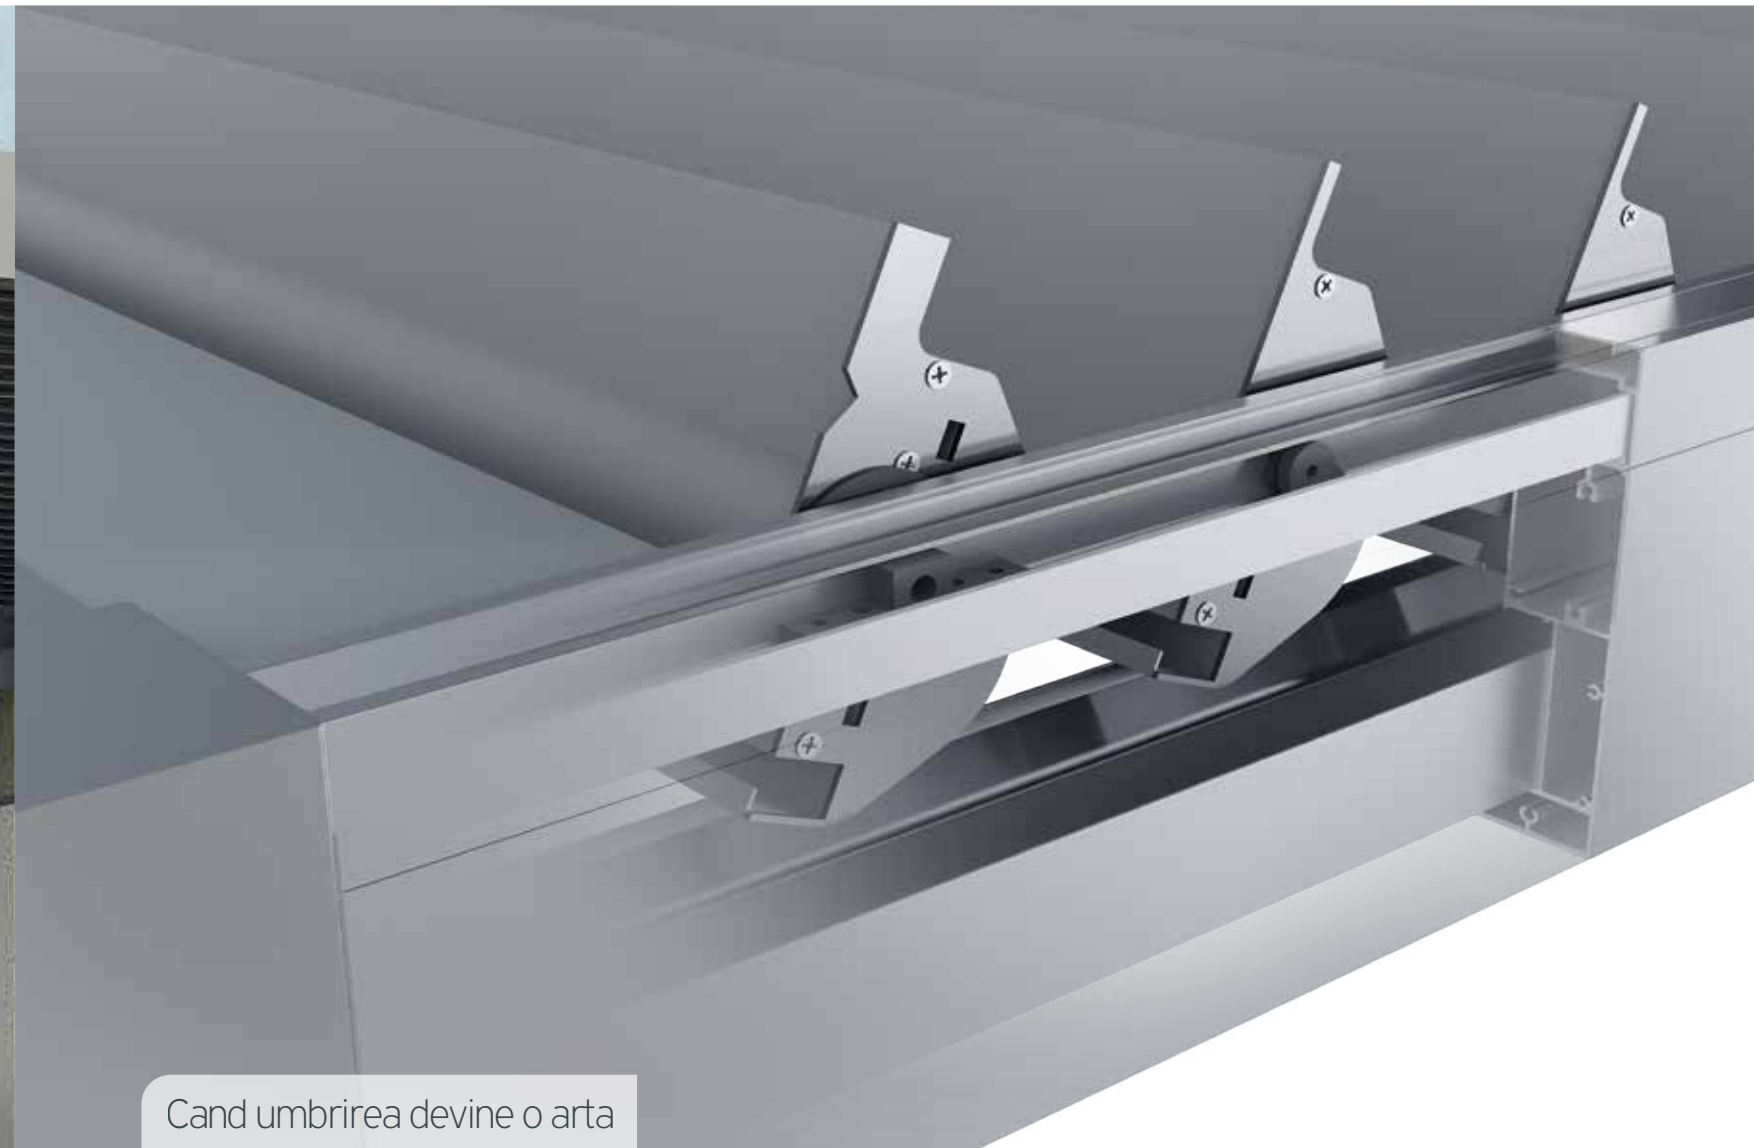

- / Additional shading either with special rolling fabric screens or with aluminium sliding shutters.
- / Integrated glass partition system, creating pleasant and full of sunlight spaces with controlled conditions.
- / Dimmable LED lights applied on transoms and louvers, providing sufficient and stylish lighting at night.
- / Infra-red heating, as well as sound devices transform the place into a comfortable lounge.

Datorita filozofiei designului bioclimatic, piesele esentiale pot fi integrate suplimentar pentru a crea un sistem controlat de umbrire, ventilatie si temperatura. Pergolele noastre va extind, la propriu, spatiul locuintei dumneavoastra, transformandu-l intr-un living pentru a fi folosit pe tot parcursul anului.

- / Umbrire suplimentara cu sisteme de rulouri textile sau cu paneluri glisante din aluminiu.
- / Posibilitatea de integrare a unor panouri de sticla, creand spatii placute, pline de lumina naturala si cu clima controlata.
- / Posibilitatea de integrare, atat pe profilele de structura cat si pe cele de lamela, a iluminatului LED oferind lumina suficienta si eleganta pe timp de noapte.
- / Posibilitatea de integrare a sistemelor de incalzire cu infra-rosu si a sistemelor audio transforma spatiul intr-un desavarsit salon confortabil.

SANTORINI

Cand umbrirea devine o arta

When shading becomes an art

Aesthetics and Design

Minimal design and high aesthetics without compromising functionality to assure unlimited comfort and exceptional living conditions. No visible fixing points and a totally concealed motor.

Effective shading solutions that upgrade your surrounding environment.

Estetica si Design

Design minimalist si o estetica deosebita fara a compromite functionalitatea, asigurand un confort nelimitat si conditii exceptionale de locuire. Nu exista puncte de fixare vizibile, iar motorul este complet ascuns.

Solutii eficiente de umbrire care imbunatatesc mediul inconjurator.

Noiseless rotation mechanism

Our bioclimatic models integrate a unique and patented rotation system, totally concealed and inserted in one of the louvers, to grant outstanding reliability as well as flawless and noiseless operation.

Mecanism de rotire silentios

Modelele noastre de pergole bioclimatice integreaza un sistem de rotatie unic si brevetat, complet ascuns si incastrat intr-una din lamele, pentru a asigura fiabilitate deplina, precum si o functionare silentioasa si fara cusur.

Unlimited solutions and flexibility to overcome any construction complexity

Solutii nelimitate si flexibilitate pentru realizarea structurilor complexe

Sturdiness and very large dimensions

Our pergola series are characterized by extreme sturdiness and can cover large surfaces, up to 50 m² surface, with only four (4) posts.

At the same time, they can resist high wind loads as well as heavy quantities of snow, up to 300 Kg/m² or 2,0 m height.

PG 120P Mykonos up to 6,2 x 4,5 m
PG 160P Santorini up to 7,5 x 7,5 m

Rezistenta si dimensiuni ample

Sistemele noastre de pergola sunt caracterizate prin rezistenta, fiind destinate acoperirii de suprafete largi, de pana la 50 m² cu doar 4 stalpi de sustinere.

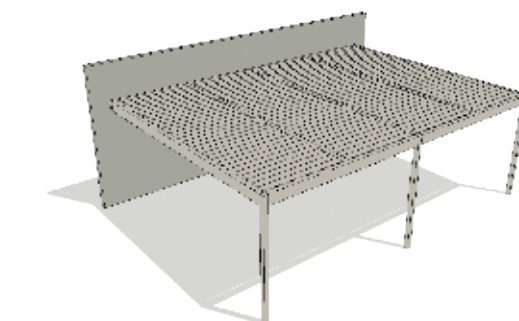

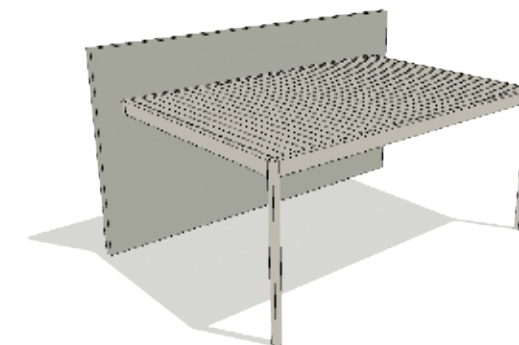

In acelasi timp, sistemul rezista la incarcari mari generate de vant, precum si la cantitati insemnate de zapada de pana la 300 Kg/m² sau 2,0 m inaltime.

PG 120P Mykonos pana la 6,2 x 4,5 m
PG 160P Santorini pana la 7,5 x 7,5 m

Protection from heavy rain and snow up to

Protectie la ploi insemnate si la incarcari de zapada de pana la

300 kg/m² / 2,0 m

Great variety of solutions

The system offers multiple construction options, meeting every need and complexity.

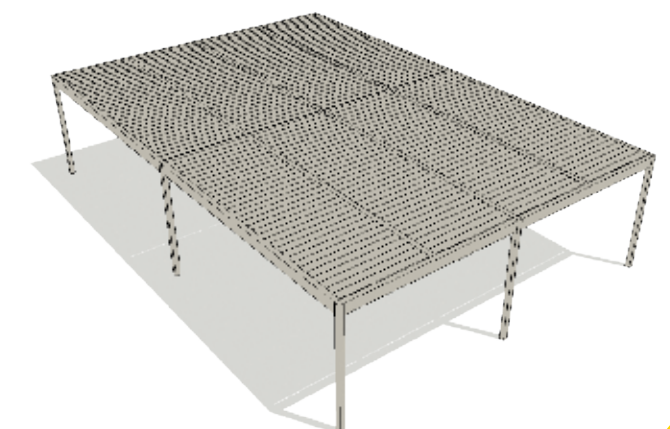

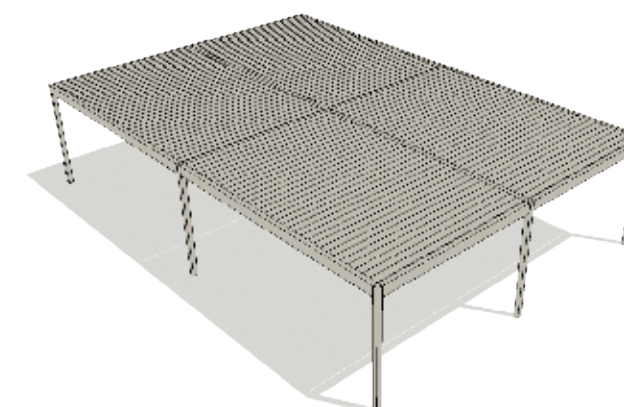

- / Free-standing and wall-mounted.
- / Single, double, corner, multiple and complicated structures.
- / Combined with side elements and other parts.

Varietate mare de solutii

Sistemul ofera optiuni multiple de constructii, satisfacand majoritatea cerintelor de complexitate constructiva.

- / Montat independent sau pe perete
- / Structura simpla, dubla, pe colt, cu module multiple sau configuratii complexe.
- / Sistemul permite integrarea elementelor laterale suplimentare.

Without central post / Fara stalp central de sustinere

Special water sealing and drainage system

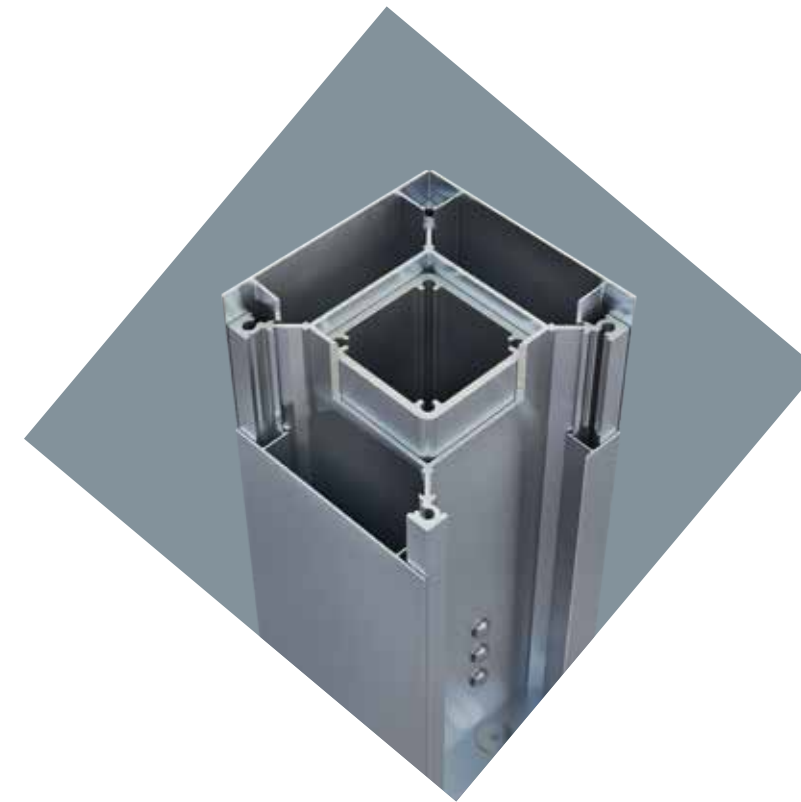

Everything has been designed in detail to prevent potential problems due to rainwater.

- / Efficient sealing is applied along the entire water path (from louvers to ground).
- / Wide gutters and other profile sections to prevent any water overflow, even in very heavy rain falls.
- / No silicone is necessary, which guarantees long-lasting performance.

Sistem special de etanșeitate și drenare a apei

Totul a fost proiectat până la cel mai mic detaliu pentru a preveni infiltrarea apei pluviale.

- / Etanșeitate eficientă pe întregul traseu de colectare și drenare a apei (de la profilele de lamelă până la baza structurii).
- / Profile cu canale generoase de preluare a apei menite să prevină pătrunderea apei în interior, inclusiv în condiții de ploi abundente.
- / Aplicarea siliconului nu este necesară, astfel garantând performanța de lungă durată.

Ease of installation

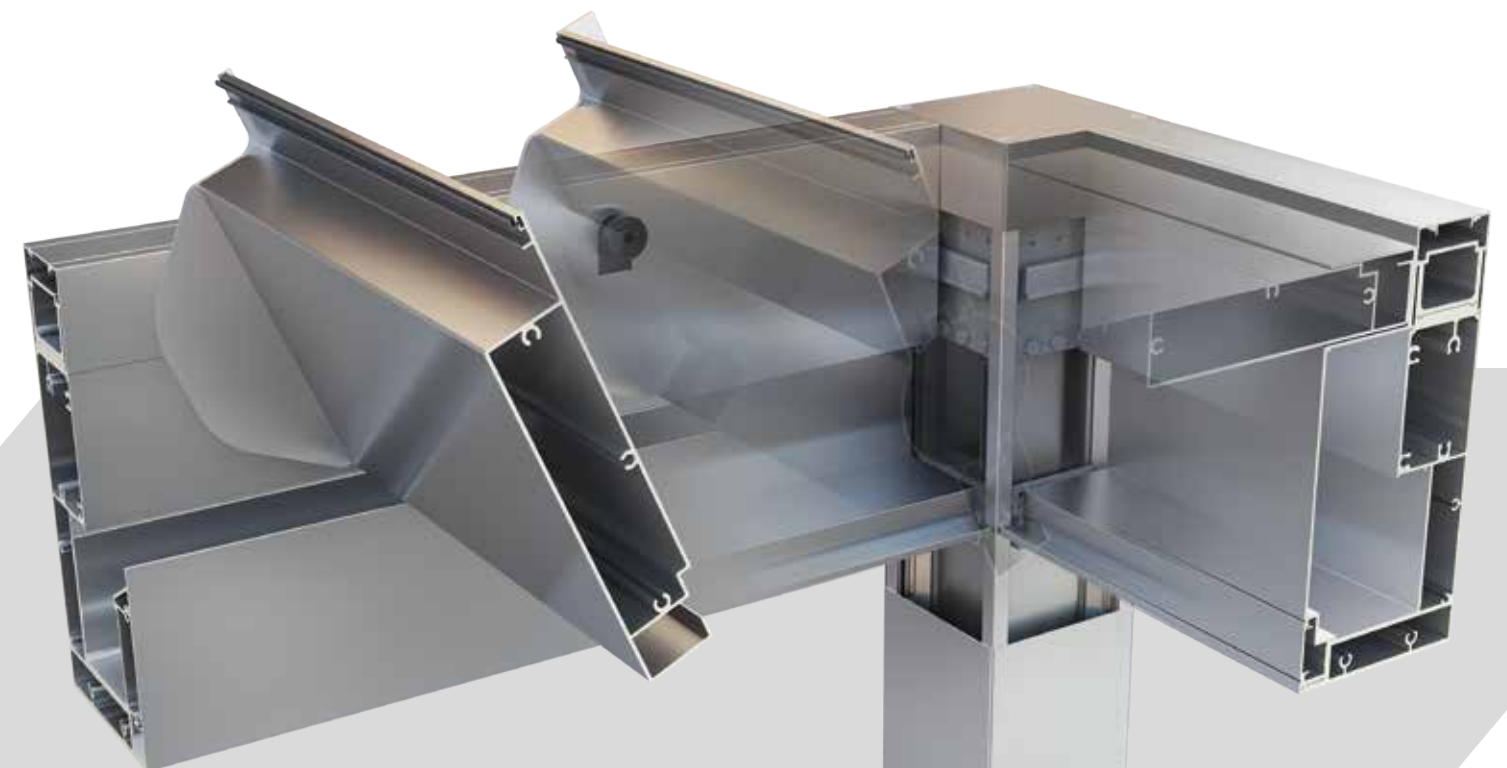

The sophisticated design with modular profiles and hook-type accessories guarantees uniquely easy and fast installation.

The whole structure can be implemented in less time, saving time and costs, without compromises on performance.

Instalare ușoară

Designul sofisticat cu profile modulare și accesorii de tip carlig garantează o instalare rapidă și ușoară.

Întreaga structură poate fi montată într-un termen redus, economisind timp și costuri, fără compromisuri în ceea ce privește performanța sistemului.

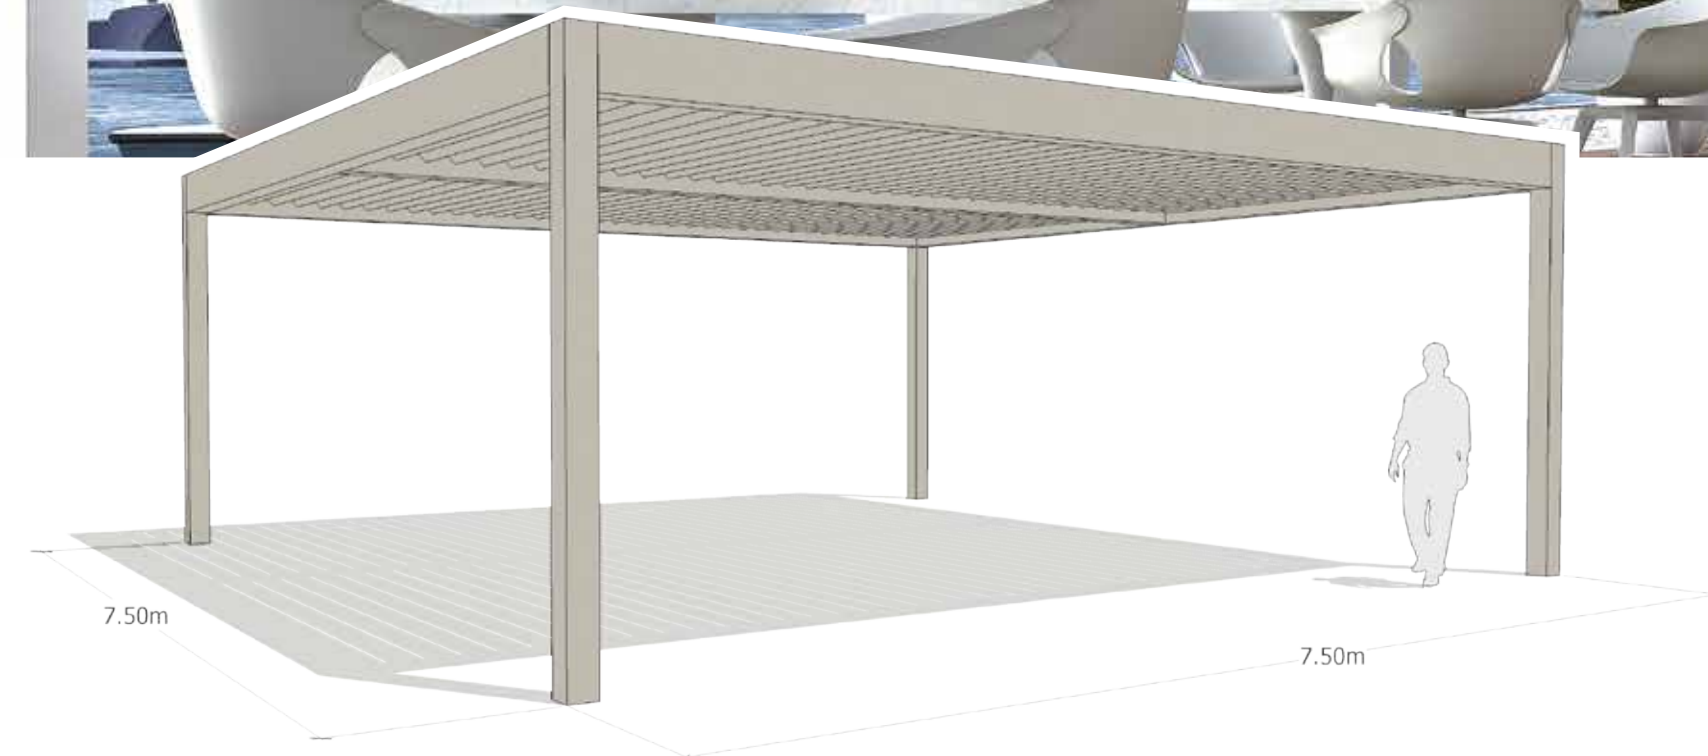

Very large spaces converted into functional and relaxing oases

Spatii de-a dreptul generoase pot fi convertite in adevarate oaze functionale si relaxante

SANTORINI

The SANTORINI model offers extreme robustness and the ability to create large constructions up to 7.5 x 7.5 m, rendering it a superb system beyond the ordinary.

- ✓ In residential use, a yard area of 50 m² can be converted into an extraordinary living space, with regulated shading and ventilation.
- ✓ In the case of hotels, restaurants and commercial spaces, multiple structures can cover and efficiently protect large areas with fewer posts, thus allowing placement of many tables underneath.

Modelul SANTORINI este caracterizat de o rezistenta extrema care asigura capacitatea de construire a unei pergole de dimensiuni considerabile, de pana la 7,5 x 7,5 m, subliniind astfel exclusivismul produsului generat.

- ✓ Aplicatii rezidentiale: o curte cu suprafata de 50 m² poate fi transformata intr-un spatiu extraordinar pentru locuit, cu sistem controlat de umbrire si ventilare, pentru maximizarea starii de bine.
- ✓ In cazul hotelurilor, restaurantelor si a spatiilor comerciale, structurile multiple pot acoperi si proteja eficient suprafete generoase utilizand un numar redus de montanti.

Smooth and noiseless operation for real coziness

Confort asigurat de functionarea silentioasa si lina

The MYKONOS model is more than a classic choice for controlled solar shading and total rain protection. Apart from exceptional functionality, the model is characterized by absolute minimalism and top sturdiness, offering elegant and quite large structures up to 6,2 x 4,5 m or 6,5 x 4,2 m in the free-standing version.

Simultaneously, the series embraces the bioclimatic philosophy, transforming an open-air space into a cozy and enjoyable place to live. The optional bicolor combinations offer a captivating design.

Modelul MYKONOS este mai mult decat o simpla alegere a unui sistem de protectie impotriva ploilor si a razelor solare. Dincolo de functionalitatea exceptionala, modelul este caracterizat in principal de un minimalism absolut si rezistenta maxima, oferind structuri largi, cu un design elegant. Dimensiunile unui singur model pot ajunge pana la 6,2 x 4,5 m, sau 6,5 x 4,2 m.

In acelasi timp, sistemul se incadreaza ideal in conceptul bioclimatic, transformand spatiul exterior intr-un living comod si placut. Optiunea de combinatii bicolore ofera pergolei un design atragator.

Rolling ZIP-screens

Thanks to the latest ZIP technology, the stretched rolling fabric screens are very strong and therefore able to cover large spans without further, in-between, support. Being part of the overall minimal design, the Rolling ZIP-screens are totally concealed within the mullions.

- / Utilising a shading fabric, the Rolling ZIP-screens provide additional peripheral shading .
- / By applying a fly-screen fabric, it offers protection from insects, without any drawbacks regarding airflow and visibility.

Rulouri textile tip ZIP-screen

Datorita celei mai recente tehnologii ZIP, rulourile textile sunt foarte rezistente si prin urmare acopera spatii ample fara suport intermediar. Facand parte din conceptul de design minimalist, rulourile de tip Zip -screen sunt ascunse in totalitate in interiorul montanților.

- / Rulourile de tip ZIP-screen ofera umbrire periferica aditionala utilizand o tesatura speciala de umbrire.
- / Utilizarea in cadrul rulourilor a plaselor impotriva insectelor, ofera protectie contra acestora, fara nici un dezavantaj privind ventilarea si vizibilitatea.

Top-hung shutter for vertical shading

A top-hung sliding shutter can be integrated into the pergola structure, creating an additional effective side-shading. Place a couple of shutters at the sunniest side and just drag them for additional vertical shading.

The optional bicolor combinations, especially the ones with wood effect colors, offer elegant design.

Obloane glisante agatate cu rulare pe calea superioara

Obloane glisante agatate pot fi integrate in structura pergolei, creand o umbrire aditionala eficienta. Montarea catorva panouri de obloane pe partea cea mai insorita va oferi o umbrire verticala suplimentara.

Combinatiile optionale bicolore, in special cele cu efect de lemn, ofera un design elegant.

Sliding glass system

Surround the pergola with a minimal and functional sliding glass system and convert it into a bioclimatic space. With almost no aluminium sightlines, it creates a transparent wall, which lets the sun in and keeps the wind out.

- / Minimal and bioclimatic result.
- / Enhanced airtightness and wind load resistance.
- / Top sturdiness and reliability.
- / Four-track guide to provide up to 4 sashes or 8 meeting stile sashes.
- / Top guide and side frames can be embedded in the pergola profiles.
- / Possibility to apply plastic or aluminium adjoining profiles for improved sealing.

Sistem glisant din sticla

Pergola poate fi echipata perimetral cu sisteme glisante din sticla, functionale si minimaliste, pentru a transforma suprafata acoperita intr-un spatiu bioclimatic. Aproape fara nici o linie vizibila de aluminiu pe verticala, creeaza un perete transparent care permite patrunderea luminii naturale si ofera protectie la vant.

- / Solutie bioclimatica minimalista.
- / Etanseitate si rezistenta la incarcarea generata de vant.
- / Robustete si fiabilitate ridicata.
- / Profile cu 4 cai de rulare care pot acomoda pana la patru cercevele glisante (sau 8 cercevele glisante la tipologiile cu inchidere cap in cap).
- / Calea de rulare superioara si cele laterale pot fi complet integrate in profilele de pergola.
- / Posibilitatea de a aplica elemente verticale din plastic si aluminiu pentru o etansare imbunatatita.

Dimmable Lighting LED

Multiple options for decorative and adequate lighting for dinner or relaxing moments during the night.

- / Dimmable LED stripes, placed coplanar in the louver and the transom profiles, provide stylish and adequate lighting.
- / Alternatively or complementarily, fitted spotlights can be placed at the transoms.

Iluminare LED

Optiuni multiple pentru iluminatul decorativ si adecvat momentelor de relaxare pe durata noptii.

- / Benzi tip LED, amplasate linear, atat pe profilele de lamela, cat si perimetral pe profilele de traversa, asigurand o iluminare eleganta.
- / Alternativ sau complementar, se pot monta spoturi pe profilele de traversa.

Equipment & Automation

Fully compatible and state-of-the-art devices, sensors as well as automation systems are available, making our pergolas even more functional and enjoyable. Everything can be controlled and regulated with a single remote control or even a smartphone.

Echipamente si Automatizari

Sistemul incorporeaza dispozitive complet compatibile, de ultima generatie, senzori si sisteme de automatizare, conferind pergolelor ALUMIL o functionalitate si fiabilitate remarcabile. Toate automatizarile pot fi controlate si operate cu o singura telecomanda sau aplicatie pentru smartphone.

Program shading and have the slats adjusting during the day (135°).
Umbrire programabila prin reglarea lamelelor in timpul zilei (135°).

Special sensor which closes the slats immediately in case of a sudden rain or snow. Senzor special care permite inchiderea imediata a lamelelor in caz de ploaie sau ninsoare.

Wind sensors to avoid any damage in harsh wind cases. Senzori de vant pentru a evita orice deteriorare datorata vantului foarte puternic.

LED stripes and spotlights can be controlled with the same remote control. Controlul iluminatului LED si al spoturilor se realizeaza utilizand aceeasi telecomanda.

Sound system with Bluetooth technology can be integrated. Posibilitatea integrarii unui sistem audio cu tehnologie Bluetooth.

Heating

Infra-red heating panel embedded in a socket on the transom, for ideal living conditions in case of low temperatures.

Incalzire

Posibilitatea de integrare a sistemelor de incalzire cu infra-rosu, creand un mediu ambiant placut chiar si in sezonul rece.

Sound

Fill the space with music controlled through wireless Bluetooth technology. Speakers can be placed either in the posts or in the transoms, especially at the flat transom cover.

Sunet

Completeza ambientul cu muzica difuzata de sisteme audio conectate prin tehnologia Bluetooth. Difuzoarele pot fi amplasate atat pe stalpi cat si pe traverse in special pe partea plata a acestora.

Enjoy the daylight, enjoy life

Bucurati-va de lumina zilei, bucurati-va de viata

CORFU

NAXOS

A complete range of fixed pergolas for effective shading and aesthetic upgrading of the surrounding environment. Available in three models, it offers ideal solutions for modern or traditional residences, hotels, dining and recreation areas.

- / Very clear lines with no visible connection points for a totally minimal effect.
- / Extreme robustness to resist intense wind turbulence and allow very large dimensions, up to 4,8 x 6,0 m.
- / Top quality surface coating and anodizing for outstanding durability, especially in seaside areas.

O gama completa de pergole fixe pentru o umbră suficientă și o ameliorare estetică a spațiilor exterioare. Disponibilă în trei variante, aceasta oferă soluții ideale pentru reședințe moderne sau tradiționale, pentru hoteluri, terase sau zone de recreere.

- / Profile cu linii drepte pentru un efect vizual total minimalist.
- / Extrem de robuste pentru a rezista încărcărilor generate de vânt și pentru realizarea de dimensiuni foarte mari, de până la 4,8 x 6,0 m.
- / Vopsire și anodizare de înaltă calitate, oferind o durabilitate impresionantă, în special necesară în zonele costale.

Create an extraordinary outdoor living, thanks to the holistic approach of ALUMIL

Bucurati-va de un confort sport in aer liber, multumita abordarii holistice a ALUMIL

Through the "Outdoor" concept, ALUMIL offers unique architectural tools to design ideal external environments. This concept rises above and goes beyond a short and conventional list of architectural solutions. Our products do not only feature top-of-the-line quality, but they can be also combined and complement each other upgrading your living space holistically.

Either separately or in combination, our outdoor systems offer creative and reliable solutions to upgrade gardens, the front and the backyard of luxury residences, as well as dining and lounge spaces in hotels, restaurants, terraces and many more outdoor spaces.

Prin conceptul "Outdoor", ALUMIL ofera instrumente arhitecturale unice pentru proiectarea unor medii exterioare ideale. Acest concept depaseste radical lista scurta de solutii arhitecturale conventionale implementata in prezent pe plan mondial. Produsele noastre se caracterizeaza nu doar printr-o calitate superioara, dar se pot combina si completa reciproc, imbunatatind esential spatiul de locuit.

Implementate separat sau combinat, sistemele noastre outdoor ofera solutii creative si fiabile, necesare modernizarii gradinilor, spatiilor adiacente a resedintelor de lux, precum si teraselor hotelurilor, restaurantelor si a altor spatii exterioare.

OUTDOOR SOLUTIONS

SOLUTII OUTDOOR

Pre-anodising for real protection against corrosion

Pre-anodizare pentru o protecție reală împotriva coroziunii

Pergolas are usually placed in coastal areas and swimming pools, where salt and chlorine can lead to corrosion. ALUMIL, as a pioneering company, combines the seaside class powder coating with the special "Pre-Anodizing" surface treatment procedure, to effectively protect your product from the threat of "filiform" corrosion.

Combine pre-anodizing with our unlimited powder coating colors, to create architectural solutions of unmatched aesthetics, unparalleled quality and long-lasting surface finishes.

Pergolele sunt amplasate de regula în zona de litoral sau în proximitatea piscinelor, acolo unde concentrația sporită de sare și clor pot duce la coroziune. ALUMIL, în calitatea sa de lider în domeniul aplicațiilor arhitecturale, oferă opțiunea de combinare a vopsirii în câmp electrostic de clasă Seaside cu tratamentul de pre-anodizare, ceea ce garantează o protecție eficientă a produsului dumneavoastră de amenințarea coroziunii filiforme.

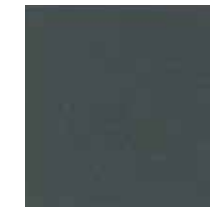

Imbinați pre-anodizarea cu varietatea nelimitată de culori RAL pentru a crea soluții arhitecturale de estetică și calitate inegalabile cu finisaje de lungă durată.
