

Alumil

SMARTIA M5600

SOLAR SHADING SYSTEM

SMARTIA M5600 is an architectural system that uses aluminium louvers with elliptical design for controlled building shading and natural lighting. The system includes a sturdy supporting system and a wide variety of louvers to cover all the construction needs.

- Wide range of solutions with louvers from 100mm to 800mm, single and composite, flat and hollow ones, fixed and adjustable
- 300mm louvers comes as single, not composite
- Energy saving and aesthetics improvement
- Easy and fast installation of the supporting framework

BASIC CHARACTERISTICS

Louvers type	elliptical, hollow or flat, fixed or rotating
Louver placement	inlaid or attached on the mullions, vertically or horizontal
Louver width (single)	100-300mm
Louver width (composite)	320-800mm
