Attention!
- The discount is applied on the sale price after taking into account the respective discount of the package (3 months, 6 months, 12 months).
- The discount concerns the first as well as every next license and the duration is calculated for 12 calendar months from the first activation.
- Customer should be new for Orgadata AG. New customer is considered to be the one who has never used or been provided with AlumilCAL or any other version of Logikal.
  The discount is not valid for LT version and the additional module of "DXF/DWG".

2) **Multiple licenses**
   For Basic package, each additional license apart from the first, is provided with 50% discount.
- The discount is applied to the sale price after taking into account the respective discount of the package (3 months, 6 months, 12 months).
- **The discount is not valid for LT version and the additional module of "DXF/DWG".**

3) **Machining and Bar Drawings**
   Module to generate bar drawings and their millings. The module calculates machining and geometries automatically. All data provided can be transferred directly to CNC machines by using modules "CNC" or "CNC with Cutting Options".

4) **CNC**
   Module to transfer CNC data to 3, 4 and 5 axis machining centers. Drilling, milling and partly notch preps can be transferred.
   (Only available with module "Machining and Bar Drawings")

5) **CNC with Cutting Options**
   This module contains all features of the above "CNC" module, and the additional possibility to transfer information required for cutting profile bars directly to the CNC machining center. The module is required for transferring data to complete profile machining centers and some 5 axis machining centers.
   (Only available with module "Machining and Bar Drawings")

The package includes:

- Updates (software versions & Alumil database).
- Phone support provided by Alumil Greece or local Alumil office.
- Online support (AnyDesk or email) provided by Alumil Greece (alumilcal@alumil.com) which is recorded as proof for provision of service. During the session there is no processing of personal data and no access to personal files. For more information, please visit our website: Disclaimer
- Guidelines for installation (CD or USB drive) and dongle key.
- Online manual in various languages (https://help.orgadata.com/).
- Training in our premises in Efkarpia, Greece, or alternatively web training via AnyDesk **for new licenses.**

Charges-Payments

- All above mentioned prices do not include VAT.
- Subscription for the package is activated upon prepayment of total fee.
- The adjustment of prices to services by the author company Orgadata AG affects the final cost of renewals and future subscriptions, as they are provided by Alumil SA to its customers. This price adjustment may occur every January 1st of the following year and will be announced in September of the current year on the website of Alumil SA. This amendment shall also be communicated to the customer along with the offer for renewal, approximately one (1) month before the end of the current period. Provided that the customer disagrees with the upcoming price adjustment, he/she shall inform Alumil SA. within the time period specified in the signed offer. In this case the subscription is not renewed, and the license key must be returned within one (1) calendar month upon expiry date of the signed offer.

Important notices regarding renewal of the service

- Any change in customer's identity and contact address should be reported in writing to Alumil SA.
- Customer is obliged to inform Alumil S.A one (1) month prior to expiry date of the rental period if he/she intends to renew or not the subscription.
- In case the customer requests a renewal offer, Alumil S.A will issue new offer and customer should pay within a given period of the agreed amount.
- In case the customer doesn't want to continue with a renewal offer, he/she should inform Alumil S.`A with written statement about the service termination.
- After the expiry date, if none of the above actions have taken place or if the customer neither responds nor pays the free for the renewal, then the subscription will automatically be ended, and dongle key will be remotely locked. In this case subscription will not be renewed and the customer is obliged to return the dongle key within one (1) month upon expiry date of the signed offer.

Contractual penalty

- The dongle is to be handled with care.
- Customer is obliged to return the dongle key within one (1) upon expiry date or non-renewal of the subscription. Otherwise, the customer shall be obliged to pay a contractual penalty in the amount of Euro 400.00 per dongle.
- In the case of loss or culpably destruction of the dongle, the customer shall be obliged to pay a contractual penalty in the amount of Euro 400.00 per dongle.
- The customer is obliged and assumes not to distribute or otherwise disclose to third parties the dongle key. In the event of a breach of the undertaking, the subscription will automatically be ended, and the customer will not be entitled to a refund.
- Alumil S.A reserves the right to claim damages beyond the contractual penalty.
