## **SMARTIA M630 PHOS**

is the ideal choice for minimal thermally insulated sliding windows and doors with wide glazing surfaces. The system can be installed either on-floor or flush to the floor offering a unique combination of elegance and functionality, satisfying even the most demanding requirements.

### **PHOS** means **LIGHT**

*"I sense Light as the giver of all presences, and material as spent Light.  
What is made by Light casts a shadow, and the shadow belongs to Light."*

Not just a window  
a point of view.

The sliding system  
SMARTIA M630 PHOS  
offers a minimal touch...

in contemporary residences combining  
minimal design with **high thermal  
performance.**

Following the  
“**less is more**” philosophy,  
all aluminium profiles can  
be hidden into the walls  
providing a total sense of  
comfort with top functionality  
and enhanced safety.

- Design ideal for “green” buildings, emphasizing on energy & money savings through thermally efficient solutions.
- Maximum natural light with only 44 mm of visible aluminium face width at the interlocking profile.
- Smart locking mechanism (international patent) with multiple locking points.
- Easy access thanks to the low threshold ideal for children, elders and people with special needs.
- Smooth sliding & maximum functionality with high resistance to corrosion with stainless steel rollers.
- Vast range of typologies available.

M630 PHOS

## TECHNICAL

## CHARACTERISTICS

VISIBLE ALUMINIUM FACE WIDTH

**CONCEALED PROFILES**

FRAME HEIGHT

32 mm

FRAME WIDTH

155 mm

SASH WIDTH

63 mm

INTERLOCKING PROFILE WIDTH

44 mm

SASH WEIGHT

UP TO 250 kg

GLAZING

32 mm

INSULATION

POLYAMIDES, PVC

The system's main characteristic is the aluminium frames that are **totally flush to the wall.**

Thus, it offers to the users **the sense of freedom** and direct interaction with the external environment.

Elegant coziness full of natural light thanks to the **system's minimal design and the wide glazing surfaces that can be integrated.** The visibility is enhanced with the slim interlocking profile of only

**44 mm** visible aluminium face width.

**Alumil** SMARTIA  
M630 PHOS

## ATTENTION

Flat threshold with a **height of only 32mm**, which was specially designed for easy and safe access to children, the elderly and people with special needs.

SMARTIA M630 PHOS uses **fiberglass reinforced polyamides** with 24mm & 20mm width, along with the contribute to the system's high energy efficiency.

Stainless steel rollers ideal for seaside projects offering **high functionality & smooth gliding** of the sashes.

The unique PVC profiles contribute to the system's **the thermal insulation and watertightness**.

## TO DETAIL

The door sash **glides easily and quietly** on the solid rail made by stainless steel AISI 316L.

SMARTIA M630 PHOS uses **high quality brushes with triple membrane** contributing significantly to the system's air permeability and watertightness.

Smart locking system  
(international patented)  
with ALUMIL design handle...

offer **high security with multiple locking points.**  
In addition, they are very easy to install after transportation  
on site and can be easily removed for maintenance.

The innovative design of the concealed water drainage system offers excellent performance even under adverse weather conditions. Specially perforated profiles and accessories, assembled together, facilitate the water outflow.

Even when the low threshold is selected for top-mounted installation, there is a special component for the concealed water drainage that offers high watertightness.

LOW THRESHOLD

EXPLOITING

EVERY CONTEMPORARY NEED

THRESHOLD WITH SUBSILL

THRESHOLD WITH SUBSILL & GUTTER

THRESHOLD WITH SUBSILL

**Alumil** SMARTIA  
M630 PH0S

In addition, the reinforced interlocking profile apart from aesthetics and functionality, offers robustness to the structure and resistance to wind loads for higher sashes.

A modern office interior with a large window, a chair, and a bathtub. The room features a light-colored wall, a wooden floor, and a large window with a black frame. A modern chair is positioned in front of the window, and a bathtub is visible in the foreground. The background shows a cityscape through the window.
